KEY CALLOUTS

- AI-driven 800G/1.6T ramp drives DC/Comms from ~\$2.8B CY23 to ~\$8B+ CY26E per JEF
- GM expands from ~37% CY23 to ~41% CY28E as 1.6T scales and Cloud Lights factory utilization climbs
- EBITDA margin: CY21A ~22% -> CY28E ~31% (JEF) — driven by DC mix shift and fixed-cost absorption
- Share count creep: ~138M CY21 -> ~210M CY28E (reflects AMAT/II-VI merger dilution + stock-based comp)
- CY29-30 not in JEF — forecast ends CY28E; further years require analyst extrapolation (Analyst Scenarios tab)
